

QUICK REFERENCE CHART: STATUTORY DISABILITY AND PAID FAMILY & MEDICAL LEAVE PROGRAMS

Employers with employees in states that have statutory disability and leave programs are obligated to comply with the provisions of those programs, including possible wage withholding and notice requirements as well as granting paid time off for qualified reasons.

Employers with employees in states that have statutory disability and leave programs are obligated to comply with the provisions of those programs, including possible wage withholding and notice requirements as well as granting paid time off for qualified reasons. This publication provides employers with a high-level overview of statutory Disability Insurance (DI), Paid Family Leave (PFL) and Paid Family & Medical Leave (PFML) programs that are currently in force or scheduled to begin in the near future.

Statutory DI provides partial wage replacement to eligible employees who are seriously ill, injured or disabled for a circumstance that is not work related. If an employer sponsors a short-term disability (STD) insurance plan through a private insurer, the STD insurance generally supplements any statutory benefits and runs concurrently with those benefits for the same qualifying reason.

Statutory PFL provides partial wage replacement to eligible employees to care for a qualified family member with a serious health condition; to bond with a newly born, adopted or foster child; or to care for a military family member injured during active duty or to provide support for family members when deployed abroad on active military duty. Some states also cover “safe leave,” generally for an employee or their family member who is a victim of domestic violence, stalking, or sexual assault or abuse. Additionally, some states have combined DI and PFL to create a PFML program that grants coverage for both personal and family reasons under qualified circumstances.

The family relationships that are recognized under statutory programs vary from state to state and often include relationships, such as domestic partners, siblings, grandparents and grandchildren, that are not otherwise recognized under the federal Family and Medical Leave Act (FMLA). For information about establishing a working definition of domestic partner for the administration of state leave programs, see the PPI publication **Domestic Partner Benefits: A Guide for Employers**.

There are some key points to consider in connection with this publication. First, employers that are covered by the federal FMLA (and/or state’s FMLA) will run such leave concurrently whenever a qualifying reason for leave and a covered family member are the same. If a state’s definition of covered family members is broader than the federal FMLA definition, those family members are bolded throughout the Reference Chart to indicate that the federal FMLA would not apply. Also of note, eligibility for DI, PFL and PFML is generally determined based on an employee’s primary work location and not their state of residence. (Employers should confer with their tax consultant as needed to determine the applicable state tax nexus for employees whose worksite of record is in one state but who predominantly work remotely from another state.) Lastly, whenever a benefit contribution amount is indicated as an employee’s responsibility, employers have discretion to contribute on behalf of their employees but are not required to do so. In some cases, imputed income may apply to such discretionary payments.

The state-by-state details appear in this publication in the order shown on the chart below.

Eligibility to Take Leave

EEs must have earned wages of at least \$300 from which SDI deductions were withheld during the 12-month base period to be eligible. CA PFL runs concurrently with the federal FMLA, CA Pregnancy Disability Leave and CA Family Rights Act for applicable qualifying events.

EEs who work in San Francisco and receive CA PFL benefits to bond with a new child may be eligible for fully-paid parental leave for up to 8 weeks under the San Francisco Paid Parental Leave Ordinance. ERs are required to supplement the CA PFL benefits to make EEs' salaries whole. The San Francisco Paid Parental Leave max. benefit in 2023 is \$2,700/ week. For the details, please refer to the [Paid Parental Leave Ordinance](#) site. Additionally, San Francisco implemented a new military paid leave supplemental compensation law ("the Military Leave Pay Protection Act" (MLPPA)) that took effect February 19, 2023. The MLPPA applies to ERs with 100+EE nationwide.

Key Dates/Updates:

Effective January 1, 2023, CFRA and California Paid Sick Leave expanded the definition of "family member" to include a "designated person" identified by the EE. A designated person is defined as any individual related by blood or whose association with the EE is the equivalent of a family relationship. An ER may limit the EE to one designated person per 12-month period. Further, CFRA added at least five days bereavement leave for EEs experiencing the death of the family members and "designated person" identified by the EE effective 1/1/2023.

Coordination with Other Benefits

EEs cannot use accrued PTO on the same days that they are receiving the PFML benefits. EEs are allowed to use accrued PTO during the 7 day waiting period, or after the PFML is exhausted or during the intermittent leave if it's not used at the same time.

If an EE receives payments from the ER's STD, LTD, or ER's paid leave policies while receiving MA PFML, the MA PFML benefits would be reduced if the total the EE receives from both payments is greater than the EE's average weekly wage.

VIRGINIA**Private Family Leave Insurance Act: Effective 7/1/2022**

PFL

Covered Employers

A **voluntary** and not a mandatory program. Virginia created paid family leave insurance as a class of insurance available in Virginia. Unlike other states' PFML programs, neither ERs nor insurers are required to have PFL policies. The new law simply permits disability insurers to offer paid family leave insurance in a form of rider or stand-alone policy in addition to disability insurance. Family leave insurance may be written as an amendment or rider to a group disability income policy, included in a group disability income policy, or written as a separate group insurance policy purchased by an ER. Benefit elements listed as having "no requirements" are not regulated by the State, and instead are subject to the ERs policy.

Qualified Reasons for Leave

Note: There is a proposed legislation Senate Bill 1101 that would establish a PFML program that provides up to 12 weeks of paid leave, beginning 1/1/2026 (contribution beginning in 2025). As of now, Virginia does not have a state-mandated paid family and medical leave program.

- Not included for ERs with under 50 EEs

Plan Options

- State-administered
- Private plan ("voluntary plan")
 - ER can choose to set up a voluntary plan for family leave, medical leave or both

Coordination with Other Benefits

EEs can provide additional benefits ("supplemental benefits") to their EEs on top of the state's PFML benefits such as additional time off to bond with a new baby or additional pay to replace wages lost while they are on leave. Additionally, WA PFML allows EEs receive STD benefits to supplement WA PFML benefits at the same time. However, the specific STD plan terms regarding coordination of benefits should be reviewed.
